Our BUSINESS

Our MISSION

Tremco Pipeline Equipment is dedicated to supplying a comprehensive range of high-quality construction, corrosion prevention, emissions reduction, maintenance and emergency response equipment and services to the oil, gas, water and petrochemical industries across Australia, New Zealand, Papua New Guinea and the Pacific Islands.

We take pride in our industry experience, knowledge, and back up service - helping our clients select the right product for every application, whether building new pipelines, carrying out maintenance and repairs, or managing emergency response situations.

We'll help you find the right product, the first time - every time.

Our BUSINESS

Founded in 1993 by Ron and Margaret Trembath, Tremco Pipeline Equipment remains a 100% Australian-owned and family-operated company based in Brisbane.

We have built a reputation throughout the industry as an honest and fair supplier, partnering only with trusted global manufacturers who share our values of integrity, quality, and service.

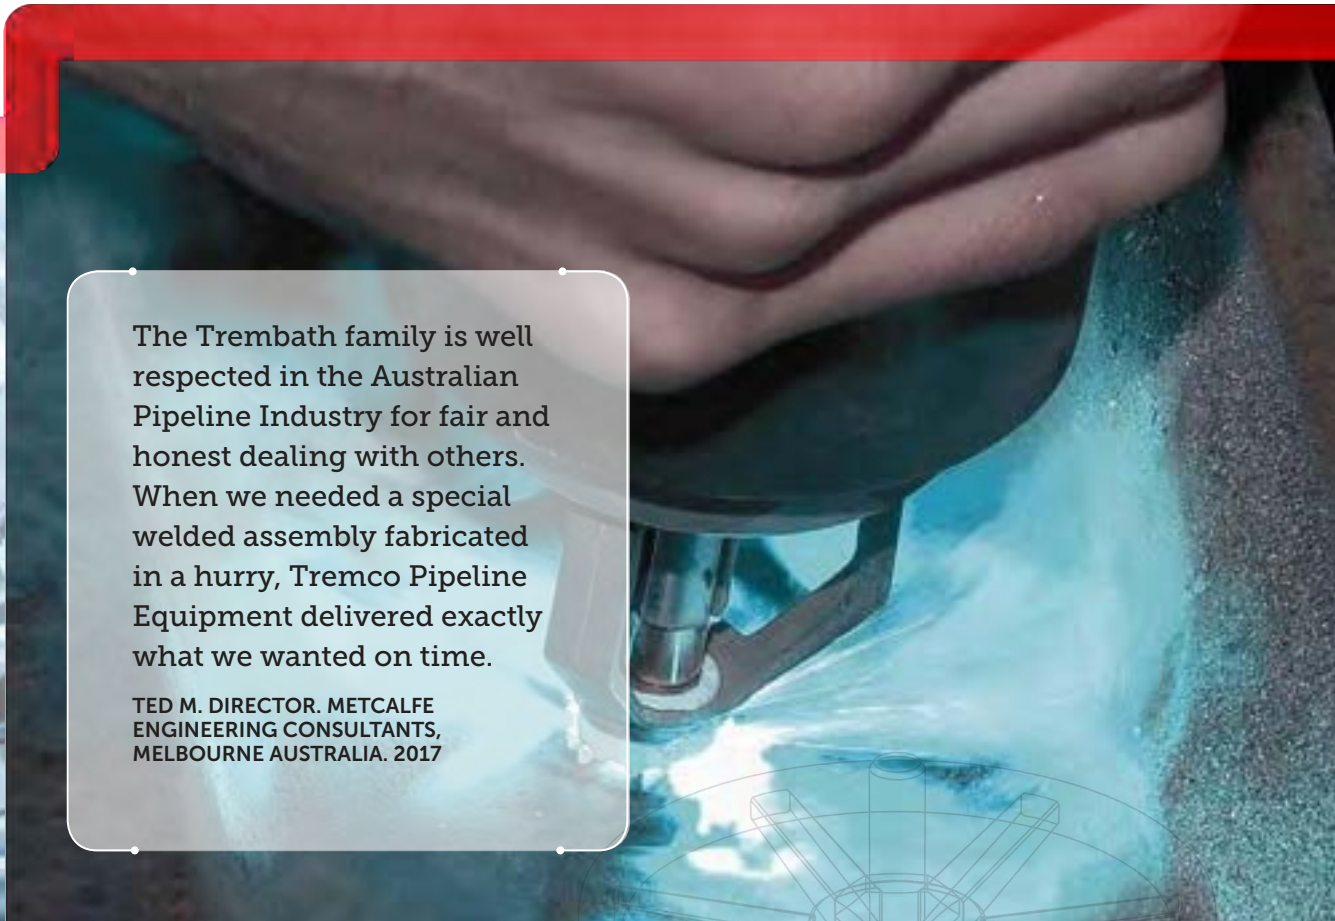

Our product portfolio includes internationally recognised brands such as: PLIDCO, Petro-Line, ZEVAC, Girard Industries, CRC-Evans Auto Weld, CDI, and Spy Holiday Detectors, BAC Corrosion Control, BKW pig switches, Cactus Flow Products, Darby Equipment, Flowstop, Industrial Degauss, In-Line Flow Products, ONIS Line Blind, Sawyer Manufacturing, Texas Pneumatics, and Weldfit.

Our experienced team provides back-up service and emergency support on all products supplied through our business.

Our COMPANY APPROACH

When you work with Tremco Pipeline Equipment, you can expect:

- **Collaborative communication** – we take the time to understand your project scope, challenges, and timelines to ensure the most suitable solutions are proposed.
- **Expert guidance** – our experienced team provides accurate, practical information on all products, their correct application, and installation requirements.
- **Efficient responses** – we pride ourselves on timely, consistent communication and clear updates from initial enquiry through to delivery.
- **Reliable supply** – with over 30 years in the industry and established partnerships worldwide, we maintain a dependable and sustainable supply chain.
- **Extensive stock availability** – we hold a wide range of commonly required products locally and provide transparent lead times for specialised or custom equipment.
- **Quality assurance** – we only represent proven, trusted brands that meet or exceed industry standards for performance and safety.
- **On-going support** – our service continues beyond delivery, with responsive after-sales support and emergency assistance for all equipment we supply.
- **Integrity and partnership** – we believe in long-term relationships built on trust, accountability, and a shared commitment to keeping critical pipeline infrastructure operating safely and efficiently.

The Trembath family is well respected in the Australian Pipeline Industry for fair and honest dealing with others. When we needed a special welded assembly fabricated in a hurry, Tremco Pipeline Equipment delivered exactly what we wanted on time.

Why CHOOSE US

When you choose Tremco Pipeline Equipment, you're partnering with an experienced and trusted Australian supplier dedicated to reliability, quality, and service excellence.

- **Specialist accreditation** – the only team outside of Petroline Canada accredited to train and supervise the installation of Petrosleeve® (4"–48"), and installation of PLIDCO® Pipeline Repair Clamps.
- **Certified expertise** – staff certified by NACE International Institute in *Coating Inspection (CIP Level 2)* and *Direct Assessment*.
- **Unmatched technical knowledge** – deep understanding of equipment, products, and processes used across the oil, gas, and water pipeline sectors.
- **Hands-on practical know-how** – extensive experience in the correct application and operation of pigging systems and related maintenance equipment.
- **Comprehensive support** – full backup service and product advice before, during, and after installation to ensure safe and effective use.
- **Repair and calibration services** – authorised service centre for SPY Holiday Detection Equipment, providing testing, repairs, and calibration.
- **24/7 emergency availability** – our team can be contacted any time, day or night, to support emergency response needs.
- **Integrity and reputation** – built over 30 years, our ethical approach and long-standing relationships with clients and suppliers have earned us a trusted reputation across Oceania.

Quality Assurance

Tremco Pipeline Equipment partners exclusively with trusted international manufacturers whose products meet rigorous industry and safety standards. We ensure all equipment supplied is fit-for-purpose, tested, and compliant with relevant codes and specifications before reaching the client. Our internal processes focus on accuracy, accountability, and traceability – from quotation through to delivery – ensuring consistent product quality and reliable performance in the field.

Our PRODUCTS

I highly recommend Tremco Pipeline Equipment. Your professional service, extensive knowledge and support over the last 25 years to our Transmission Team has been outstanding. Looking forward to your continued support.

SAM.L . JEMENA GAS NETWORKS

Construction

Supporting pipeline construction from welding to field coating.

- **CRC Evans Auto Weld:** automatic welding and coating systems
- **Sawyer Manufacturing Company:** beveling equipment, external and internal pipe clamps, weld testing, tools and accessories, auxiliary equipment, pipe bending and lifting equipment, cold cutting tools, pipe stands.
- **Tuffstand by DuraPlas:** durable stackable pipe stands
- **Darby-Midwestern Construction Equipment:** pipe bending machines and mandrels, line-up clamps, roller cradles, and pipe facing machines.

Maintenance

Minimising downtime through reliable, high-performance maintenance solutions.

- **Girard Industries:** poly pigs and spheres, mandrel pigs, cups and discs
- **CDI:** pig tracking and signaling equipment
- **In-Line Flow Products:** quick opening closures
- **BKW:** pig switches
- **Cactus Flow Products:** shut-off pig valves
- **ONIS:** quick-action line blinds
- **Flowstop:** low-pressure pipe plugging equipment
- **Industrial Degauss:** pipeline welding demag units
- **Safepurge:** purge stands
- **Texas Pneumatic Tools:** air movers and jet fans
- **Weldfit:** high-pressure line stop fittings
- **ZEVAC:** emissions reduction equipment for venting procedures.

Corrosion Control

Protecting assets and extending pipeline service life through proven corrosion prevention technologies.

- **SPY:** holiday detection
- **Girard Industries:** pipeline cleaning pigs
- **BAC Corrosion Control:** pin brazers and cathodic protection equipment
- **RCSL:** corrosion monitoring equipment
- **COTT Mfg:** cathodic protection test stations
- Monolithic insulation joints and insulation gasket kits.

Emergency Response

Delivering rapid, safe, and reliable repair solutions when pipeline integrity is compromised.

- **PLIDCO:** high-pressure leak repair fittings
- **Petro-Line:** Petrosleeve Steel compression repair sleeves
- **Weldfit:** Planned scheduled work that includes high-pressure line stop fittings.

Hire Equipment

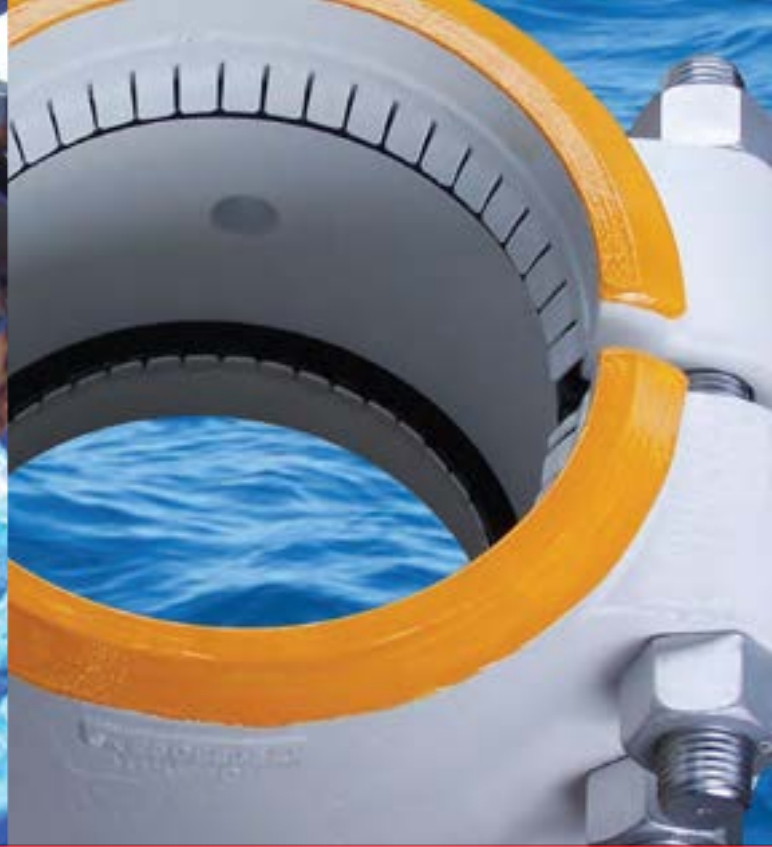

- 6-20 inch **CRC Evans Centurion Pipe Bending Machine**
- 12-24 inch and 36-48 inch **Darby-Midwestern double head iron roller cradles**
- **ZEVAC Twin HP** emission reduction equipment
- **Industrial degauss pipe demag units** for pipe up to 48"
- **Spy holiday detectors**

Our product range is backed by local stock availability, global-manufacturer support, and over 30 years of experience supplying critical pipeline infrastructure across the region.

Our International Suppliers

COMPANY NAME	PRODUCTS	COMPANY DETAILS
PLIDCO	Pipeline repair and maintenance fittings, incl. Split+Sleeves, Smith+Clamps, and Weld+Ends	Est. 1961 in Cleveland, Ohio
PETRO-LINE	Petrosleeve permanent steel compression pipe repair sleeves	Est. 1977 in Edmonton, Canada
GIRARD INDUSTRIES	Pipeline cleaning, batching and gauging pigs, spheres, mandrel pigs, cups, discs, and pig tracking accessories	Est. 1958 in Houston, Texas
PIPELINE INSPECTION COMPANY (SPY)	Holiday detectors, jeep meters, and electronic pig tracking systems	Est. 1953 in St Louis, moved to Houston, Texas in 1968
CDI (CONTROL DEVICES, INC.)	TraxAll pig tracking systems and non-intrusive pig passage indicators	Family owned and operated. Est. 1982 in Broken Arrow, Oklahoma
BAC CORROSION CONTROL	Corrosion monitoring systems, pin brazers, and CP products	Est. 1954 in the UK
ONIS	Quick-action line blinds and isolation systems for safe pipeline maintenance	Headquartered in France; servicing global energy and process industries
TEXAS PNEUMATIC TOOLS	Air movers, jet fans, and pneumatic tools for confined space ventilation and cleaning	Est. 1977 in Houston, Texas
ZEVAC	Emissions reduction equipment for venting and gas recovery during maintenance and commissioning	Est. 2014 in Houston, Texas
CRC-EVANS (AUTO WELD)	Automatic welding and coating systems for onshore and offshore pipeline construction	Est. 1933; headquartered in Houston, Texas
SAWYER MFG COMPANY	Welding, beveling, pipe bending and lifting equipment, pipe clamps, welding and auxiliary construction tools	Est. 1948 in Tulsa, Oklahoma
FLOWSTOP	Low-pressure pipe plugging and line isolation equipment	Based in the USA; providing pipeline safety and isolation solutions
IN-LINE FLOW PRODUCTS	Quick-opening closures, pigging valves, and pressure-containing equipment	Est. 2000. Headquartered in Houston, Texas
CACTUS FLOW PRODUCTS	Shut-off pig valves, check valves, and pressure control products	Est. 1996 in Houston, Texas
INDUSTRIAL DEGAUSS	Pipeline welding demagnetising units and demag systems	Based in the USA
SAFEPURGE	Purge stands and systems for pipeline and welding applications	Based in the USA
COTT MANUFACTURING	Cathodic protection test stations and accessories	Headquartered in USA. Serving global market for 20+ years
DARBY MIDWESTERN CONSTRUCTION EQUIP.	Pipe bending machines and mandrels, line-up clamps, roller cradles, and pipe facing machines	Est. 1950. Based in Tulsa, Oklahoma
WELDFIT	Hot Tap, Line - stop sleeves	Est. 1977 in Houston, Texas

Safety

Tremco Pipeline Equipment takes a practical and proactive approach to safety across all aspects of our operations.

We are committed to protecting the health and wellbeing of our team, clients, and partners, and to maintaining the highest standards of safety and compliance on every job.

Our team members are trained, competent, and fully resourced to provide accurate technical advice and to complete onsite activities safely and responsibly.

We ensure that personal protective equipment (PPE) is always worn appropriately, and that all vehicles, tools, and equipment meet or exceed required safety and maintenance standards.

Training and Support

Tremco Pipeline Equipment provides operator preparedness training for the PLIDCO and PetroSleeve emergency pipeline repair systems. Our training programs are designed to ensure personnel are fully equipped with the knowledge and confidence to respond safely, efficiently, and in compliance with manufacturer standards.

Available training includes:

- **Petro-Line (PetroSleeve)** Practical Applicator and Certified Installer Training – hands-on instruction/troubleshooting techniques to ensure safe installation
- **PLIDCO** – hands-on instruction to ensure safe re-use and compliance of PLIDCO fittings following service.

Our Past Projects

Tremco Pipeline Equipment has supplied construction, maintenance, and emergency response equipment for major onshore and offshore pipeline projects, and terminal projects, across Australia, New Zealand, PNG, and the Pacific Islands.

Our equipment and expertise have supported projects of all scales – from regional distribution networks to multi-billion-dollar LNG developments – ensuring reliability, safety, and compliance at every stage.

Selected Project Involvement

Major Australian Pipelines

- Gilmore to Barcaldine Pipeline – Tremco Pipeline Equipment's first major project (1994), providing construction equipment and on-site technical support for anti-corrosion over-the-ditch coating applications
- Moomba to Sydney Pipeline
- Ballera to Mount Isa Pipeline
- WAG Pipeline (Western Australia Gas)
- 42-inch LNG pipelines for QCLNG, APLNG, and GLNG projects in Queensland
- 42-inch QGLNG PLIDCO/Petrosleeve supply
- Queensland Gas Pipeline - emergency response and repair

Offshore and Refinery Projects

- Offshore platforms – ESSO
- Refinery terminals and infrastructure for:
 - Shell J.U.H.I. (Joint User Hydrant Installation) JV
 - Caltex – Sydney, Melbourne, and Brisbane
 - ExxonMobil

It has been well over 15 years since I first dealt with Tremco Pipeline Equipment. The team don't just supply pipeline equipment or products they provide professional and quality service. A great bunch of people to deal and work with. Thanks for all the support and services over the years.

ANDREW H. PIPELINE & PRESSURE VESSEL ENGINEER. ADETRA PTY LTD

Future Aspirations

Tremco Pipeline Equipment remains committed to supporting the evolving needs of the pipeline industry through innovation, reliability, and service excellence.

We will continue to:

- **Maintain and expand** our range of high-quality, proven products that our clients depend on.
- **Incorporate new technologies and equipment** that enhance safety, efficiency, and environmental performance across pipeline operations.
- **Strengthen partnerships** with leading global manufacturers to ensure our customers have access to the most advanced and reliable solutions available.

Our focus for the future is simple - to build on more than three decades of trusted service by continuing to deliver the right products, the right advice, and the right support to our industry.
